Oleksandr Perekhrest

Frontend Developer (React / React Native)

Kyiv, Ukraine
olexandrperekhrest@gmail.com
+380932563621
LinkedIn · Telegram

SKILLS

Core
React, React Native, TypeScript, JavaScript (ES6+), Next.js, Vite

State & data
Redux, Redux Toolkit, RTK Query, redux-saga

Forms
redux-form, Formik, React Hook Form, Yup

Styling
Bootstrap, Tailwind CSS, SCSS, responsive layout (mobile-first), Figma

Mobile
React Navigation, native modules (camera, biometrics, step counter), i18next

Backend
Node.js, Express, Prisma, PostgreSQL

Testing & tools
Jest, Git, Git Flow, ESLint, Prettier

AI tools
Claude Code CLI, Gemini, Codex

LANGUAGES

Ukrainian — native
Czech — C1
English — B2

PERSONAL QUALITIES

- Experience leading teams and taking responsibility for results.
- Adapt and learn quickly: relocation and work in a foreign-language environment, self-driven transition into IT.

INTERESTS

My dog, outdoor walks, rock concerts, cooking, houseplants.

PROFILE

Frontend Developer with 3+ years of experience in React, React Native and TypeScript, building and maintaining web and mobile applications. Experienced in modernizing legacy applications, implementing complex UI workflows, integrating native mobile functionality, and developing features for healthcare platforms. Hands-on experience with React 19, Next.js and Redux Toolkit, including backend work with Node.js, Express, Prisma and PostgreSQL. Comfortable working with existing codebases, solving technical challenges, and leveraging AI tools to improve development efficiency.

EXPERIENCE

Frontend Developer, Intelliceed — Feb 2024 – Present

Project 1: Healthcare Platform (Web & Mobile)

Tech stack: React, React Native, TypeScript, Redux, Redux Saga, Vite, React 19, Tailwind CSS, SCSS.

- Developing and evolving legacy web portals (React, Redux, redux-saga, redux-form, Bootstrap, SCSS): new features and improvements to existing functionality.
- Multi-step wizards (patient onboarding, meal and exercise plans, recipes) with dynamic fields and multi-level validation.
- Recursive catalog trees with drag-and-drop (recipes, exercises, products); rendering optimization with memoization.
- Adapting existing screens for mobile: login, sign-up, main pages, complex forms.
- Refactoring class components into functional ones, upgrading outdated libraries.
- Audit of legacy applications and a modernization plan.
- React Native: developing new features and optimizing existing ones, working with native modules (step counter integration, photo and video capture, voice messages, biometric authentication); adding a second language (i18next).
- Developing features in a new portal: Vite, React 19, TypeScript, Tailwind CSS, React Hook Form.
- Maintaining technical documentation.
- Working with protected health information (PHI) in line with HIPAA requirements.

Project 2: HRM System

Tech stack: Next.js, TypeScript, Node.js, Express, Prisma, PostgreSQL, Jest.

- Updating endpoints as part of a legacy controller refactor, table changes and migrations (Prisma, PostgreSQL), test coverage (Jest).
- UI improvements in the Next.js frontend (App Router, TypeScript, Tailwind CSS).
- Browser extension (vanilla JavaScript, HTML, CSS): LinkedIn profile data parser and a form for creating candidates in the HRM system.

Project 3: Healthcare Mobile App

Tech stack: React Native, Figma.

- Pixel-perfect UI redesign based on Figma designs.

AI-assisted development (Claude Code CLI, daily)

- Daily AI-assisted development with Claude Code CLI across the full cycle: planning, feature implementation, refactoring, debugging, testing and documentation.
- Reviewing and validating all AI-generated code for correctness and consistency with project conventions.
- Extending Claude Code with custom skills and MCP server integrations (Slack, Trello, GitHub, Jira).
- AI-driven analysis of large legacy codebases: mapping architecture and dependencies, auditing and planning modernization.

TRAINING 2022–2024

- JavaScript course (3 months), then one year of mentored learning with senior developers on pet projects: React, Redux, redux-form, forms, navigation, state management.
- Udemy (Maximilian Schwarzmüller): React – The Complete Guide · React Native – The Practical Guide · Understanding TypeScript
