Oleksandr Perekhrest

Web Engineer

React · React Native · Next.js · Node.js · TypeScript

Kyiv, Ukraine
olexandrperekhrest@gmail.com · +380932563621
Portfolio · GitHub · LinkedIn · Telegram

SKILLS

Languages
TypeScript, JavaScript (ES6+), HTML, CSS

Frameworks & build
React (incl. React 19), Next.js (App Router, static generation, server actions), TanStack Router, Vite

Backend
Node.js, Express, REST API, GraphQL, MVC, Prisma, PostgreSQL, Google OAuth (arctic), Resend

Mobile
React Native, React Navigation, native modules (camera, video, audio, biometrics, step counter)

State
Redux, Redux Toolkit, RTK Query, redux-saga, MobX

Forms
React Hook Form, TanStack Form, redux-form, Formik

Validation
zod, Yup

Styling
SCSS / SCSS Modules, Tailwind CSS, Bootstrap, design tokens, light/dark theming, responsive mobile-first layout, Figma

UI libraries
shadcn/ui, Radix Primitives, TanStack Table, Recharts, dnd-kit

i18n
i18next, next-intl

Testing & quality
Jest, React Testing Library, Vitest, Playwright, MSW, axe (WCAG 2.1 AA), Lighthouse CI, SEO

Tooling
Git, Git Flow, GitHub Actions, Docker, pnpm monorepo, Vercel, Render, lefthook, Conventional Commits, ESLint, Prettier

AI tools
Claude Code CLI, Gemini, Codex

LANGUAGES

Ukrainian — native
Czech — C1
English — B2

PERSONAL QUALITIES

- Experience leading teams and taking responsibility for results.
- Adapt and learn quickly: relocation and work in a foreign-language environment, self-driven transition into IT.

PROFILE

Web Engineer with 3+ years of experience in React, React Native and TypeScript, building and maintaining web and mobile applications. Experienced in modernizing legacy applications, implementing complex UI workflows, integrating native mobile functionality and developing features for healthcare platforms. Hands-on backend work with Node.js, Prisma and PostgreSQL, plus public full-stack projects with automated tests, CI and deployment. AI-assisted development with Claude Code is part of my daily workflow.

COMMERCIAL EXPERIENCE

Web Engineer (Frontend), Intelliceed — Feb 2024 – Present

Project 1: Healthcare Platform (Web & Mobile)
Tech stack: React, React Native, TypeScript, Redux, redux-saga, Vite, React 19, Tailwind CSS, SCSS.

- Developing and evolving legacy web portals (React, Redux, redux-saga, redux-form, Bootstrap, SCSS).
- Multi-step wizards (patient onboarding, meal and exercise plans, recipes) with dynamic fields and multi-level validation.
- Recursive catalog trees with drag-and-drop; rendering optimization with memoization.
- Refactoring class components into functional ones, upgrading outdated libraries; legacy audit and modernization plan.
- Adapting existing screens for mobile: login, sign-up, main pages, complex forms.
- React Native: new features and optimization; native modules (step counter, photo and video capture, voice messages, biometric authentication); second language (i18next); bug fixing in push notifications and deep links.
- New portal features: Vite, React 19, TypeScript, Tailwind CSS, React Hook Form.
- Working with protected health information (PHI) in line with HIPAA requirements.

Project 2: HRM System
Tech stack: Next.js, TypeScript, Node.js, Prisma, PostgreSQL, Jest.

- Updating endpoints as part of a legacy controller refactor, table changes and migrations (Prisma, PostgreSQL), Jest tests.
- UI improvements in the Next.js frontend (App Router, TypeScript, Tailwind CSS).
- Browser extension (vanilla JavaScript, HTML, CSS): LinkedIn profile parser and a candidate-creation form for the HRM system.

Project 3: Healthcare Mobile App
Tech stack: React Native, Figma.

- Pixel-perfect UI redesign based on Figma designs.

AI-assisted development (Claude Code CLI, daily)

- Full development cycle with AI: planning, feature implementation, refactoring, debugging, testing and documentation; reviewing and validating all AI-generated code.
- Custom Claude Code skills and MCP server integrations (Slack, Trello, GitHub, Jira).
- AI-driven analysis of large legacy codebases: architecture and dependency mapping, audits, modernization planning.

PERSONAL PROJECTS OPEN SOURCE

Additional personal projects on GitHub with tests, CI/CD and deployment, including:

- **authkit-next-express** — full-stack authentication app (Next.js, Express, PostgreSQL, Prisma, Google OAuth). Demo
- **portfolio-next** — bilingual portfolio site with its own design system (SCSS Modules, Radix Primitives). Live
- **Warehouse Manager** — inventory admin SPA (React 19, Redux Toolkit + RTK Query, TanStack Router/Table/Form, MSW mock API); 664 unit and 16 e2e tests, axe accessibility checks. Demo

PROFESSIONAL TRAINING

- 2022–2024: JavaScript course (3 months), then one year of mentored learning with senior developers on pet projects: React, Redux, redux-form, forms, navigation, state management.
- Udemy (Maximilian Schwarzmüller): NodeJS – The Complete Guide (MVC, REST APIs, GraphQL, Deno) · React – The Complete Guide · React Native – The Practical Guide · Understanding TypeScript
